

shoosmiths

“ The team come from a variety of backgrounds including legal, manufacturing, retail and government. We have people in the department who have been working in IT for more than 20 years and some who have come from a business and spending their first year in IT. Although often a very pressurised environment, it is done with a smile on everyone’s faces and is an enjoyable and pleasant environment to work in.

Our technology

It is all about flexibility, I think that whenever there is a problem occurring the idea is to restore services as quickly as possible. I liken it to utilities when you turn on a tap at home, water is coming out.

Our team

I think the team enjoy working here for two main reasons. Firstly, Shoosmiths values its employees by offering a flexible benefits package. Everyone is valued. Secondly, we offer a challenging, varied and stimulating career. I am often told that our systems here are good, reliable and better than they are used to in other companies. My experience is that we have got a long way to go but my objective is for us to be seen as the innovator and leader in the use of IT in the legal sector.

What can we offer you

Why would you want to work at Shoosmiths? We are a growing Firm and as a result, we are making the necessary investments in the systems and technology that we require. There are a lot of systems and environments that we work in so there is a lot to do. Everyone can make a difference - everyone’s opinion is valued.”
